

How to Find & Repair a Leak in Vinyl Air Beds

To Find a Leak:

- *Vinyl air bed needs to be completely inflated
- *Spray a small section of the bed @ a time with a soapy water solution & then press down on that section
- *The forced air will create bubbles in the soapy water solution

To Repair a Leak:

- *Vinyl air bed must be fully inflated
 - *Cut the vinyl patch a little larger than the leak {hole, rip or tear}
 - *Put glue around the leak on the bed
 - *Put glue on the back of the vinyl patch
 - *Adhere the patch to the bed
 - *Let it set up 24 to 48 hours before you use or deflate the bed
- **Please remember that it must be a VINYL repair kit & NO SUPER GLUE!!!!
- **A Vinyl Repair Kit can be found @ a waterbed store, swimming pool store, hardware store & various .com sites like wm.com, waterbedsplus.com, waterbeddoctor.com, etc...
